About our products in catalog,

■ Products marked “ ● ”

● marked items stand for welded chains. (In our product, only stainless steel and titanium chains are welded.)

Those chains are welded by either laser or plasma process.

One of the merits of welded chains is less discolor and annealing problems occur compared with soldered chains.

Welded chains are different from soldered chains in below points.

1) Measurement differs from same item number in soldered version.

2) Please pay attention on “punching” process. We recommend to use suitable punching tool.

Please feel free to contact our sales staffs for tool supply.

■ Product marked “ ●●● ”

Although most of catalog products are in raw, plated products are available from our current stock as well.

● mark : Gold plated items are available from stock

● mark : Rhodium plated items are available from stock

● mark : Nickel plated items are available from stock

We also have different variations of plating colors and nickel free process is available, please feel free to contact our sales staffs for your high developed request.
